**KRB Installations** are expert in the design, installation, testing and maintenance of electrical and network cabling solutions. We work in partnership with leading industry manufacturers to deliver the perfect blend of quality, value and total client satisfaction.

Formed in 2002, KRB is a leading electrical contractor that continues to deliver value, quality and client satisfaction to an ever widening range of markets.

**A flexible approach...**

While we can provide a turnkey service including specification, design, installation and commissioning we also work from drawings and schedules provided by clients and their consultants.

**A systematic and methodical approach...**

We leave nothing to chance. Once instructed our design and CAD team start bringing your project to life, developing a detailed scope of works and generating detailed plans. This attention to detail coupled with an emphasis on regular communication; installation efficiency and professional project management ensure projects are delivered on time and to budget. Needless to say all our activities are underpinned by a strong Health & Safety culture.

# Electrical Contracting Services

Our expertise in the design, installation, testing and maintenance of electrical services has helped organisations of all sizes to implement flexible, scalable and manageable solutions that cater for their needs today and into the foreseeable future. We are Approved Contractors of the NICEIC (National Inspection Council for Electrical Contractors).

# Lighting Systems

Apart from providing lighting to enable visual tasks to be undertaken, a well-designed system of lighting will also enhance the mood of staff leading to a general feeling of wellbeing and improved productivity.

By combining our expertise in lighting systems design, access to market leading lighting technology and controls we can deliver your perfectly lit working environment with an emphasis on energy efficiency.
